

This expansion of media corporation ownership is disgusting and typical of this secretive, corporate influenced administration. This will only make our mis-informed media distribute increasingly censored information. Powell and the FCC owe Americans the right to know more about this ruling before it is decided and how it will impact their daily lives. The FCC, Bush administration and media companies have done everything possible to hinder public awareness of this ruling. Remember Powell- your high-priced lifestyle and salary come from the sweat of Americans you and your cronies are trying to oppress. One day - we will educate the people enough and they won't stand for your lies and deception.
